

Water Safety Awareness – Quiz 2

Where can drowning occur?

There are 7 questions as part of this quiz, please answer every question to the best of your knowledge, you do not need to get every question right as this is not a pass or fail activity.

Your facilitator will provide the answers to the quiz at the end of the activity.

Participant name: _____ Date of training: _____

Question 1

View all the images below and select those items that may pose a drowning risk to children.

| | | |
|--|--|--|
| <input type="checkbox"/>  | <input type="checkbox"/>  | <input type="checkbox"/>  |
| <input type="checkbox"/>  | <input type="checkbox"/>  | <input type="checkbox"/>  |

Question 2

Is the following statement true or false?

Using a bath seat or bathing aid for children can increase the child's safety?

- True
- False

Question 3

Select the correct response from the options below:

You are at a local public pool and supervising a 7-year-old child who is new into your care and who is swimming in the pool, you are sitting on the edge of the pool when you receive a text message, you pick up your phone and start texting back which takes all of your attention. Would this be considered as providing acceptable safe supervision of the child?

- Yes, this is acceptable supervision
- No, this is not acceptable supervision

Question 4

Select the correct response from the options below?

You are applying to become a carer and a CSO has come to complete a Household Safety Check on your home. You live on a large rural property which has several water troughs and a dam for the animals which are all visible from your home. Do these water areas pose a risk to children?

- Yes, the water troughs and dam are drowning hazards and pose a significant drowning risk to children if they were to live on the property
- No, as the water trough and dam is only for the animals, children can be told this and would understand not to go near them.

Question 5

Select the correct answer/s from the options below:

You are caring for a 2yo and a 4yo and its bath time, you fill up the bathtub and put both children into the bath together and duck to the kitchen to quickly make a cup of tea. Have you put the children at risk of drowning?

- Yes, young children should not be left alone in a bathtub with water at any time.
- No, you are only going to be quick, they should be fine for a couple of minutes.

Question 6

Is the following statement true or false?

It's safe to leave water in small portable pools (such as the popular "clamshells") as they don't pose a drowning risk?

- True
- False

Question 7

Select the correct response below:

Which of the statements about flood water is NOT correct?

- A strong current can lift a heavy vehicle off the road
- It's impossible to tell the condition of a road or bridge when it's under water
- If you see other cars drive safely through flood water, then it's safe to follow them
- Parents/caregivers should have a back up plan in case severe weather or flooding occurs around the school pick-up time

This is the end of quiz 2.

Please hand in your marked quiz to the facilitator after they have gone through and discussed the correct answers with the group.
